

University of Regina
Ense470 – Winter 2014 – Lab 5
2014-2-28

Objective

- To cover more information on OSG
- To get students to complete the milestone1 “warmup” tasks.

Procedure

1. See the handout for last lab (lab4) for an overview of the project as it was presented then
2. See the resources for lecture 14, which we did not get to in yesterdays’ lecture, and now be covered.
3. Study the code I’ve posted in the Lab5 resource folder, code which describes
 - parsing command-line arguments
 - controlling the verbosity of notification messages from OSG

Deliverables

- During today’s lab you should finish the entire “warmup”, or at the latest by 23h55 Sun 2 Mar 2014.

Due Date

There’s nothing due this coming lab period, on Fri 7 Mar 2014, but I’ll expect to see some non-zero progress by then.

You have to submit milestone1 in its entirety by Wed 12 March 2014.
